Professional Summary

DevOps Engineer with hands-on internship experience in CI/CD, Docker, Kubernetes, GitHub Actions, Jenkins, and AWS. Backed by 1 year of production mobile development, serving 100,000 users. Skilled in GitOps, Argo CD, Terraform, Ansible, Prometheus, Grafana, and Blue Green/Canary deployments. Passionate about building reliable, automated systems.

Core Competencies

- **CI/CD & GitOps:** GitHub Actions, Jenkins, Argo CD, Azure Devops
- **Containers & Orchestration:** Docker, Kubernetes
- **Monitoring & Logging:** Prometheus, Grafana, Loki, ELK Stack
- **Scripting & Automation:** Python, Bash
- **Cloud:** AWS
- **IaC:** Terraform, Ansible, Helm, Kustomize
- **Version Control:** GitHub
- **Security:** SonarQube
- **Artifacts:** JFrog, Nexus
- **Databases:** PostgreSQL, MySQL

Professional Experience

Devops Engineer Intern | Kubenine, Bengaluru, Karnataka Mar 2026 - Present

- Deployed 5+ microservices on AWS EKS using Docker, Helm, and Kubernetes, reducing deployment time by 40% through standardized Helm chart templates.
- Provisioned **10+** AWS infrastructure (VPC, EC2, ECS, S3, RDS, DynamoDB) using Terraform.
- Configured monitoring and log aggregation using Prometheus, Grafana, and Loki.
- Secured cloud environments using IAM, WAF, Guard Duty, and SSM.
- Configured CloudFront and Route 53 for content delivery and DNS management.

Devops Engineer | Brototype (Apprenticeship), Calicut, Kerala May 2025 – Mar 2026

- Built **3+** CI/CD pipelines using Jenkins, Azure DevOps, and GitHub Actions for automation.
- Deployed and managed containerized applications using Docker on Kubernetes clusters.
- Implemented GitOps-based continuous delivery workflows using Argo CD.
- Configured enterprise CI/CD pipelines using Maven, SonarQube, and JFrog Artifactory.
- Automated Linux administration tasks and Git workflows using Bash scripting
- Implemented Blue-Green and Canary deployment strategies to achieve zero-downtime.

Software Developer (SDE1) | ChargeMOD, Trivandrum, Kerala

Jan 2024 – Mar 2025

- Developed and implemented a robust wallet system integrated with Razorpay ensuring seamless transaction handling, including success and failure scenarios.
- Integrated an in-app notification system to deliver offers and critical emergency updates, enhancing user experience for over 100,000+ users accessing EV charging services, improving user engagement by 30%.
- Implemented the MQTT protocol for real-time communication in electric vehicle chargers.

Flutter Developer Intern | Luminar Techno Lab, Kochi, Kerala

May 2023 – Sep 2023

- Contributed to mobile app development using Flutter, ensuring user-friendly experiences.
- Utilized Git for version control and managed projects efficiently.
- Enhanced app performance by implementing best practices and troubleshooting issues, reducing average screen load time by 20%.

Projects

Deployment Strategies using ArgoCD (Blue-Green & Canary)

[Github](#)

- Implemented Blue-Green deployment strategy to enable zero-downtime releases.
- Configured Canary releases to gradually shift traffic and reduce production risk during updates.
- Integrated Argo CD to implement GitOps based on continuous delivery workflows.
- Automated rollback mechanisms to ensure quick recovery in case of deployment failures.

Enterprise CI/CD Pipeline with Maven, Jenkins & Kubernetes

[Github](#)

- Implemented CI/CD pipelines in Jenkins for build and deployment automation.
- Configured SonarQube to enforce code quality gates and maintain code standards.
- Managed secure artifact storage and versioning using JFrog Artifactory.
- Deployed application to Kubernetes cluster with automated rollout process.

Azure DevOps CI/CD Pipeline for MERN Application

[Github](#)

- Configured Azure Repos for source control and branch management.
- Integrated Azure Boards for task tracking and work item management.
- Integrated SonarCloud for automated code quality analysis and quality gate enforcement.

GitHub Actions CI/CD Workflow for JavaScript Application

[Github](#)

- Designed and configured GitHub Actions workflows for automated build and test processes.
- Configured workflow triggers based on pull requests and branch merges.
- Ensured continuous delivery with minimal manual intervention.

Education

- BSC Computer Science (2020 - 2023) Lement College of Advanced Studies, Pattambi
- Higher Secondary in Computer Science & IT (2018 - 2020) GVHSS Desamangalam
